How to report.

If you see, hear, or experience something unusual during your work, report it. This way, the port remains a place where you can work safely. There are various ways to report something, **including anonymously**.

Or choose to report outside your organisation

1. Discuss it with someone in your organization.

For example, a colleague or supervisor whom you trust.

2. Report confidentially.

If possible, report it confidentially within your organization. For example, to the confidential advisor in your company.

Can't or don't want to do this?
